RE: Emergency Powers Order 2016-2 Status Update

Mr. Whistle:

In response to the boil water advisory that was issued on June 2, 2016 and extended water outages at the Morningstar Water Supply System (System No. NM3510524), the New Mexico Environment Department (NMED) issued Emergency Order 2016-2 on June 24, 2016. This Emergency Order requires the Morningstar Water Supply to take specific actions to address the ongoing water emergencies at the water system.

Although, as of September 1, 2016 the New Mexico Environment Department has allowed the boil water advisory at the Morningstar Water Supply System to be lifted, there are several outstanding requirements of Emergency Order 2016-2 that must be completed.

The New Mexico Environment Department's Drinking Water Bureau (NMED DWB) has evaluated Morningstar Water Supply's compliance with the requirements of the Emergency Order as of September 2, 2016 and is providing you with the attached status update.

As of September 2, 2016 the Morningstar Water Supply has accumulated the following fines:

Requirement Number	Deadline	Days Non-Compliant	Accumulated Fines
1	July 1, 2016	63	\$63,000
2	No later than 24 hours after repair has been completed	Pending	Pending
3	July 15, 2016	49	\$49,000
5	Noon Each Friday beginning July 1, 2016	9	\$9,000
6	Close of Business each day	3	\$3,000
7	July 15, 2016	7	\$7,000
Totals		131	\$131,000

Please be aware that all of the requirements outlined in Emergency Order 2016-2 must be completed. Fines may continue to accumulate until those requirements have been fully completed and verified as required.

If you have any questions or need additional clarification concerning this status update please call 505-476-8635 or e-mail joe.martinez@state.nm.us.

Respectfully,

Stephanie Stringer, Chief
Drinking Water Bureau
Water Protection Division

**NEW MEXICO ENVIRONMENT DEPARTMENT
Emergency Powers Order No. 2016-2**

Requirement Number	Action Required By Morningstar Water Supply	Deadline	Current Status	Comments On Current Status
1	Optimize distribution system operation by identifying any deficiencies including, but not limited to, line leaks and valve operations to ensure maximum delivery of potable water to all storage tanks and customers; submit a distribution system status report to DWB no later than close of business Friday July 1, 2016 including all discovered distribution deficiencies identified along with a prioritized corrective action plan. This work must be completed and verified by an independent third party approved by DWB.	July 1, 2016	Non-Compliant	<ul style="list-style-type: none"> • On Friday July 1, 2016 Mr. Whistle submitted a distribution system deficiency report via email. In the email, Mr. Whistle states that the report was compiled by Mr. Thomas Barrow, operator. • The submitted report includes ten various sections which include fire hydrants, valves, dead end lines, storage tanks/facilities, dedicated sample sites, commercial meter cans, safety equipment, and other various system issues. • Emergency Order 2016-01 requires that the work that is done in order to comply with Requirement #1 be “completed and verified by an independent third party approved by DWB.” • Due to the fact that this evaluation and report was not compiled by an independent third party that was approved by DWB, the Morningstar Water Supply is currently not in compliance with this order. • On Friday July 8, 2016 the NMED provided Morningstar with a status update that indicated that they were not in compliance with Requirement #1. • On July 12, 2016, Germaine Chappelle, attorney for Animas Valley Land & Water (Animas Valley) submitted several documents indicating that distribution analysis work had been proposed by Animas Valley and the Molzen Corbin Engineering firm over the past several years. The documents included a system map as well as various other proposals and executed contract documents. During a conference call with Animas Valley representatives, NMED stated that Morningstar Water Supply would still be required to submit an updated distribution system evaluation report and updated distribution system map. If previous distribution analysis and work had been completed Animas Valley could include aspects of that previous work within the report that is currently required to be completed, but NMED would not solely accept the previous Molzen Corbin report as compliance documentation for the requirements of Emergency Order 2016-2. • On July 15, 2016 Ms. Chappelle, legal representative for Animas Valley submitted an extension request on behalf

				<p>of Animas Valley. The extension request included a request for extension of Requirement #1.</p> <ul style="list-style-type: none"> On July 22, 2016, Ryan Flynn, former Secretary of the New Mexico Environment Department denied the July 15, 2016 Extension Request. As of the date of this update, the requirements of Requirement #1 still have not been completed.
Requirement Number	Action Required By Morningstar Water Supply	Deadline	Current Status	Comments On Current Status
2	<p>Any distribution deficiencies that are identified in Section 1 of this Order shall be repaired in a timeframe acceptable to DWB. Completion of any required distribution repairs shall be verified by an independent third party. All repair activities shall be performed in accordance with all regulatory requirements and best management practices for repairs of this nature, including but not limited to appropriate disinfection and special sampling. The System shall provide a report of each repair to DWB along with disinfection and sampling results no later than 24 hours after the repair has been completed.</p>	<p>No later than 24 hours after repair has been completed</p>	<p>Non-Compliant</p>	<ul style="list-style-type: none"> Requirement #2 is dependent on the results of the distribution system deficiency report required in Requirement #1 On July 15, 2016 Ms. Chappelle, legal representative for Animas Valley submitted an extension request on behalf of Animas Valley. The extension request included a request for extension of Requirement #2. On July 22, 2016, Ryan Flynn, former Secretary of the New Mexico Environment Department denied the July 15, 2016 Extension Request. Due to the fact that Requirement #1 is currently non-compliant, and the fact that an acceptable timeframe for completion of work has not been accepted by DWB, Requirement #2 is currently in non-compliant.
3	<p>In conjunction with identification and repair of distribution system deficiencies, the System shall either develop or update a comprehensive distribution system map which includes identification and location of distribution system features including but not limited to, size and type of all distribution lines, distribution valves and their operational status, hydrants, storage tanks, interconnections, and operating pressure zones. This comprehensive map shall be submitted to DWB no later than July 15, 2016.</p>	<p>July 15, 2016</p>	<p>Non-Compliant</p>	<ul style="list-style-type: none"> Requirement #3 is dependent on the results of the distribution system deficiency report required in Requirement #1 On July 12, 2016, Ms. Chappelle, attorney for Animas Valley submitted several documents indicating that distribution analysis work had been proposed by Animas Valley and the Molzen Corbin Engineering firm over the past several years. The documents included a system map as well as various other proposals and executed contract documents. During a conference call with Animas Valley representatives, NMED stated that Morningstar Water Supply would still be required to submit an updated distribution system evaluation report and updated distribution system map. If previous distribution analysis and work had been completed Animas Valley could include aspects of that previous work within the report that is currently required to be completed, but NMED would not solely accept the previous Molzen Corbin report as compliance documentation for the requirements of Emergency Order 2016-2.
